

# Graco Inc., Alco Valves Group, High Pressure Equipment Company & Staffordshire Hydraulic Services Ltd.

Visit us at OTC 2017, Booth #4261

Graco's chemical injection equipment and dispensing pumps are operated by solar, AC and pneumatic sources. Our Harrier+™ controllers offer cellular connectivity & SCADA capability.

Alco Valves Group manufactures and supplies valves to the oil and gas (onshore and offshore), petrochemicals, automotive, nuclear and defense industries.

High Pressure Equipment Company (HiP) supplies high pressure valves, fittings and tubing to the oil and gas industry, which includes a full line of valves and fittings meeting NACE MRO175.

Staffordshire Hydraulic Services Ltd (SHS) designs and manufactures standard and custom-built air driven liquid and gas test equipment, chemical injection units, power units and hydraulic offshore consoles for high pressure needs.
